Composer, Sound Designer, Aspiring Audio QA Tester

Junior sound designer in my final year of Music & Sound Design @ ISART Digital Paris. Looking to specialize in video game audio and more specifically Audio QA testing, I am eager to work as part of a team so as to learn about communicating. I am aiming to share my passion for sound and video game with anyone with whom I will have the chance to work with.

## Interests :

I have been playing piano for more than a decade, and I now want to try and learn some new instruments, from violin to drums, bass to accordion. I enjoy playing online games such as League of Legends and CS:GO but I also play solo games, as long as the storyline is interesting.
